Performa Pallet®

With more focus being placed on health and hygiene in the food and related industries, the Performa Pallet provides an answer to both your reputation and your bottom line. The raw material that makes up the pallet protects against moisture and the absorption of any foreign substances into the pallet, preventing cross contamination of separate products. This also makes it easy to clean and sterilize, making the pharmaceutical application endless.

Add to this the advanced design which makes the pallet super strong and prevents the damage of packaging materials caused by protruding nails and broken slats most commonly associated with wooden pallets.

The pallet also carries a 3 year pro-rata guarantee and in unlikely event of the pallet being damaged, the top or bottom components can be individually replaced thus eliminating the need to replace the whole pallet.

Packaging Capabilities- Performa Pallet Deflection & Creep Test

EVEN WEIGHT DISTRIBUTION OF **1375KG** SET ON Performa Pallet*

Method and time	Height From Ground (mm)	Deflection (mm)
Pallet Deflection Before loaded	150	0
Pallet Loaded with 1375KG	140	10
After 2 Hours	138	12
After 6 Hours	135	15
After 12 Hours	133	17
After 24 Hours	133	17
After 48 Hours	133	17
Load Removed From Pallet	140	10
2 Hours After Load Removed	150	0
